**Caution:** Information in this release note is subject to change without notice and does not represent a commitment on the part of Allied Telesis, Inc.

While every effort has been made to ensure that the information contained within this document and the features and changes described are accurate, Allied Telesis, Inc. can not accept any type of liability for errors in, or omissions arising from, the use of this information.

---

## 10GbE UTM Firewall

The Allied Telesis 10GbE Unified Threat Management (UTM) Firewall is an ideal integrated security platform for modern businesses. A powerful 10G firewall and threat protection is combined with comprehensive VPN capability. Easily and securely connect the head-office to branch-offices for an innovative high performance business solution.

It is a virtualized version of the AlliedWare+ Next Generation Firewall and runs on the Vista Manager Network Appliance (VST-APL).

### New features in 5.5.2-2.1

For more information about the new features in this version, please refer to the [AlliedWare Plus Release Note](#).

---

# Obtaining User Documentation

## 10GbE UTM Firewall documentation

The Datasheet, Installation Guide, User Guide, and Release Notes for 10GbE UTM Firewall are available from:

- [Virtual UTM Firewall Datasheet](#)
- [Vista Manager Appliance \(VST-APL\) Installation Guide](#).
- [Virtual UTM Firewall User Guide](#)
- [Virtual UTM Firewall Release Note](#)
- [AlliedWare Plus Release Note](#)

## AlliedWare Plus documentation

For full AlliedWare Plus documentation, see our online documentation library on [our website, alliedtelesis.com](#).

## Upgrading VST-APL

To upgrade the version of your VST-APL Vista Manager Network Appliance, refer to the section “Upgrade procedure” in the [Vista Manager Network Appliance \(VST-APL\) Release Note](#).

## Upgrading the 10GbE UTM Firewall

To upgrade the version of your 10GbE UTM Firewall, refer to the section “Upgrading to a new version of Virtual UTM Firewall” in the [Virtual UTM Firewall User Guide](#).
